MESSAGE FROM THE PRESIDENT by Bill Allen

Since our last issue, many regional and international events have been sailed, some of which are detailed herein. London has been selected for the 2012 Olympics, and while nothing is set, all indications are that the Star will continue to be included in the games. Our relationship with the international community continues to be strong. I do not anticipate any pressure for changes to our class events or formats for the next few years. We will enthusiastically participate in the 2007 ISAF World Championships in Cascais, Portugal. All other class events will be sailed according to class rules.

In our last issue, we included a detailed survey for members to indicate their feelings about the class. Enclosed herein is a summary of the responses received from 218 of our members. While this is a small segment of our total membership (7%), it appears that all of the geographic and demographic groups were well represented.

In general, you all feel that our class is among the best in the world; a great boat, the best competition, and wonderful people, and that no major changes should be undertaken. In particular, we should strive to reinforce the qualities that have made the class great, namely, a boat for both top-level international (Olympic) competition as well as weekend club racing.

In the area of sailing, it is apparent that the quality of racing is most important as an attendance reason, and in most cases the expectations of excellent racing are being met.

There were some comments about making the racing format more flexible, with perhaps shorter races and more of them in a day. I note that the new resolution for rule 34 addresses this aspect, so please be sure to vote on this item in November.

Some sailing related concerns were expressed, mostly regarding the cost of the boat and the need to recruit more new and younger sailors to the class. The class management team is committed to keeping costs in check, and does not envision any further use of exotic materials. We are also trying to help local fleets to recruit new sailors, although much of this effort

must be done by the local sailors themselves. Tom VanderMolen, our marketing manager, is working on ideas to spur interest, with special events and promotion activities.

Another major area of the survey concerned class communications. We have re energized communications over the past year, and the changes seem to be well received. Over 75% of responders gave a good or excellent rating to the LOG, Starlights, eStarlights, and the web site. There is some feeling that we have overlap, but all four received significant support. Accordingly, the class management team will continue with all four communication vehicles, and has NO plans to charge a subscription fee. We would like to save mailing costs of the Starlights, so please let the Central Office know if you would prefer to receive your copy only on the web.

Many people indicated they would like to see more sailing tips, technical articles and people stories, including pictures both in Starlights and the web site. A more international focus was also requested. We will try to improve in both of these areas. Of course, we need help from you all to do this, so please send in reports and suggestions for articles to either David Bolles or Melinda Berge, either by email or to the Central Office.

It was also interesting to see that over 50% of those responding own another boat, either power or sail, and that so many of our members are active in other sports.

Thanks to all who responded to our survey. Please feel free to forward additional comments to myself, David, Melinda, or any member of the class management team.

Good luck to all for the rest of the sailing season. Hope to see many of you on the course.

The beautifully maintained Star #942, Maunzi, on Attersee owned by Dr. Berndt Kretschmer of Salzburg

**RESULTS OF THE
STAR CLASS SURVEY**

There were 218 respondents to the Star Class Survey which was posted on the Star Class web site and in Starlights. The results of the survey are as follows:

District	Respondents	Average Age
1	28	52
2	17	55
3	0	
4	20	42
5	13	53
6	23	47
7	2	47
9	15	51
10	14	43
11	2	45
12	23	48
13	17	41
14	11	40
17	13	42
18	5	33
20	4	71
21	5	65
Isol	3	57
unknown	3	
Total:	218	average age: 48

The ages of respondents ranged from 17 as the youngest, with 85 being the oldest.

The number of respondents was 7% of class membership which numbers approximately 3025. Of these respondents, 94 respondents, or 43%, were from Districts 1, 4, 6, and 12, the US / Canadian border.

The bulk of the respondents are from USA and Canada, with 134 responses. While this group makes up 29% of total membership with 877 members, they made up 61% of the respondents to survey. Europe has 65% of membership with 1981 members but with 70 responses made up only 32% of the respondents to the survey. South America, Australia and Isolated make up 5% of membership with 167 members and with 13 responses also made up 5% of survey.

The respondents rated their Sailing Ability as follows:

District racers –	104
Club racers -	55
Gold-silver racers -	48
Professional -	9
Fun –	2

Starlights Comments

Better photographs and technical tips

Between the Website and eStarlights and log, there's not much else necessary. The quarterly Starlights are nice but not necessarily current. I don't see the need with the other forms of communication.

I like it, but as a pro writer, I'm often looking for a warmer feature on one of our great sailors. With info for sure, but mostly a glimpse of their lives and their lives within sailing.

I liked the old, ordinary paper, non-glossy format.

I liked the quarterly magazine style format of the previous Starlights much better. There was a more professional, quality appearance when compared to the cheap paper newsletter look

It is very important to have in hand the monthly activity of the Star Class so you can communicate with other sailors interested in the Stars

Less duplication between printed and e-Starlights

Mailing is costly I know, but Starlights and the Log are the only communication most members get from their ISCYRA membership. The website is great but a hard copy to a member reminds them that they do belong to the organization.

Nice big picture on the front cover, pictures of the competitive boats inside the cockpit as well as hull shots

The color Starlights of a couple years ago was a great magazine. Up-to-date regatta info can be found on the web, but there is still something enjoyable about sitting down to read a magazine over coffee.

eStarlights Comments

A bit more international orientated

A little short on content, but still nice to receive

Best thing that has happened to the class and really the only necessary expense

Consider using e-Starlights to communicate the latest in regatta results/notices and particularly important class news that needs to be communicated promptly. More...

e-Starlights can be used toward relaying regular communications from the class to it's members at a low cost. Use this and the website for distributing everyday info to the members and make the printed Starlights a more quality publication.

Links to website info most important

Love getting it on-line. Save the paper on mine. Sailing tips are the most helpful for me - especially making the Star go fast in all winds and points of sail is the biggest challenge.

Other Communication Comments	
I think the website is great, current and topical. I like the log for the tradition and the hardcopy records	
Classified section is great - self administered results timely and easy	
I find the website perfect. Don't change anything! About the Log, I find the new one much better than before.	
Invaluable reference. A little less regatta results and more informative articles would be nice. Updates on new boat designs, retrofitting upgrades etc.	
It would be good if either Log or website carried addresses of members	
Need to solicit more how-to's from the experts in the class. The level of technology/performance tips should be spread across the levels of the class more, to improve quality in all.	
Try to send the LOG as early in the year as possible. It's a great book for almost a century with lots of history!

Star Class Survey General Comments

What Do You Think Of The Class?	
Great racing. However the cost of new boats is getting very high.	
It has only been 1/2 of my life!	
Great Boat, average class organization. (but we have come through a difficult time & I think we are moving in the correct direction)	
Great boat, great central office, but I think there should be a sub organizations based on continents, such as North America, Europe, Australia. I think I would enjoy my boat more if I lived on the east coast of the US.	

What Do You Think Of The Class?

Awesome, and going in the right direction! I like the new changes.
--

Simply the strongest, best class in the world. Best competitors, most organized, great "adult" class, great values, need to gain greater access for graduating college sailors (but the level of the class) seems to do this already.

It is the best. Let's keep the weekend participant interested and involved.

The Star Class offers us weekend warriors a chance to sail local fleet races, district championships, regional regattas, and national/international championships with the worlds best sailors.

Strong class that has a lot of opportunity to build on the local fleet level. More grass root efforts are needed to help build fleets. Always amazed at how small NA fleets are given the pleasure that comes from racing these boats.
--

I think it is an excellent boat to sail. I get the chance to learn and compete with the top sailors. Also, it is a great class all around because you can just sail it in your fleet, or you can try to go for the Gold in the Olympics.
--

Sometimes I wonder, what the ISCYRA does with all our membership-money. Is there a possibility to get a view on this?

Love it. The boat and the people. But I have not broken a mast yet..
--

Do You Have Anything Else To Add?

Our fleet CLIS has three Stars for other's to use and they are used by other sailors. I have owned a Star since age 15
--

Need to find more durable sails. Everybody is always needing new sails. Can't we get someone to make something that lasts more than 5 races?
--

I love the historical information available on some fleet sites, maybe add profiles of sailors AND boats. Profile more old boats to encourage new participation, as is being done in some fleets.

We have to think about class rules which fit in today's ISAF Olympic rules. Especially the procedure to change rules!

Class and fleet promotion needs to be improved - this is primarily the responsibility of the district and fleet organizers.

Important to stay Olympic and important to stay local fleet friendly too. Don't be in a big hurry to change things. I believe the reason we are having trouble attracting new members is the necessity to carry gorilla crews.
--

Although I'm a girl I love to sail Star races. I'm glad to see that you are working hard and creating an up-to-date internet page and also the Starlights magazine. Thanks a lot for that.
--

Our Star is on loan to the Museum of Yachting to be used by sailors on a request basis.

Fleet development is hard due to the perception that the Star boat is (a) really expensive and (b) only suitable for big men. In an older era, wives and daughters routinely sailed, owned, and crewed the boats. Now it is almost unheard of. Wifely resist
--

We like to think that every boat in our fleet is for sale to new members. That is the way we have tried to grow our fleet.
--

Racing formats are always the same -- it would be fun to have more races in one day with a variety of courses , encourage use of colored sails so spectators can follow boats more easily , conduct some events in venues where spectators can see the races .
--

The rules 34.3 should be changed and adapted like other Olympic classes and the Olympic program: More Races 11-16. Shorter Courses: 60-90 minutes.
--

The most challenging and at the same time most satisfying boat to sail. This class still retains sailors who are members of the finest of sailing traditions - marked by fair competition, camaraderie, sportsmanship and general respect for fellow sailors
--

The decision making process should be made quicker. a resolution brought forward now would be voted on only at the World's 2006...
--

Understanding the class rules is a matter of opinion. Understanding does not mean always agreeing!
--

The whole prospect of sailing a Star is very expensive. Some limits should be applied, for instance, to the number of new sails that a person can buy in a season, such as is done in the Etchells Class
--

Classic sailing is in the air. We should catch this wave with events for wooden Stars.
--

**REPORT ON THE
EASTERN HEMISPHERE CHAMPIONSHIP**

Fifty-two teams from 16 nations competed in the Eastern Hemisphere Championship. The 2005 Eastern Hemisphere Championship, a Silver Star event, formerly known as Spring European Championship, was organized by the 80-years-old Thunersee Yacht Club (TYC), one of the most active sailing clubs in Switzerland with a strong boat policy direction on Olympic and international classes.

Due to the surrounding mountains the winds on the lake's surface proved to be tricky and provided for interesting racing. Only the required four races were completed. Robert Stanjek and Markus Koy of Germany won the series

Please see the very extensive report on this event which is posted on the Star Class web site.

2005 KIEL WEEK

More sunshine than sailing
by Alexander Hagen

When the Olympic classes prepared for the biggest sailing event in the world the non-Olympic classes already suffered from a Scandinavian high pressure that presented high temperatures and very little wind. By the end of the event we sailed only 2 out of 5 days, but these days were excellent, the very best that sailors can get, with 10-20 knots of wind quite steady from the north and some seas plus a lot of sunshine. Just the last race on Saturday ended a little uncomfortable when the wind died completely on the finishing run and the competitive fleet of 40 boats from 16 nations gathered on the finish line all at the same time. But a dock-party from the Kiel Fleet cheered those up that had disadvantage on the water.

Oh – by the way, the Star Class was highly focused by the media. It was not only Beat Stegmeier and his boat SUI 7990 that took attraction. The press was hunting for his skipper Russell Coutts who jumped into the Star and respectfully finished 7th.

In the end we had a fine series of 5 races with a throw out and our new members Mateusz Kusznierevicz / Dominik Zycki from Poland won, followed by Americans George Szabo / Eric Monroe and Benny Andersen / Mogens Just from Denmark.

Some comments about the wind and weather:

Out of the five scheduled days of racing the Stars were able to race only two days, on Day 1 when they got in races 1 and 2 and on Day 4 when they got in races 3, 4 and 5. Days 2, 3 and 5 saw no racing due to the lack of wind.

ANNOUNCEMENTS FROM THE TAB

Interpretations to Specifications

By Hannes Gubler, Chairman
Technical Advisory Board

The Technical Advisory Board has decided on the following interpretations to the following Specifications:

1. Materials for the Backstays, Spec. 11.2:

Many sailors use new materials like "Dyleema" for the upper and the lower backstays. Since the backstays are considered as "running rigging" and Spec. 11.2 states that the running rigging may be of "any material" the TAB confirms that the material for the backstays (uppers and lowers) is optional.

2. Coating of the Jibstay, Spec. 11.1:

Some sailors use coated wires or tubes around the jibstay to protect the sails. The TAB considers that means to protect the sails for a longer life are in the interest of the Class. It is however obvious that - on the other hand - an aerodynamic advantage resulting thereof can in no way be accepted. The TAB has therefore decided the following limitation with a clarifying addition to Specification 11.1:

The Jibstay may have a firmly fitted tube or coating totaling a maximum of 7,2 mm in diameter.

3. Position of the Cockpit, Spec. 6.1:

In connection with the approval of new Starboat designs it had been discovered that the position of the cockpit is not clearly defined and only described as laying between the Hull Stations 5 and 8. Considering the official Drawing Nr. 2 and the existing tolerances concerning the Deck the TAB has limited the position of the cockpit opening with a clarifying addition to Specification 6.1 as follows:

The forward end of the cockpit opening is limited with 3685 maximum forward of Point "T" and the aft end with 1605 minimum forward of Point "T".

For the Technical Advisory Board

2008 WORLD'S CHAMPIONSHIP

By Rick Burgess, Chairman IGC

The Star Class will have the 2008 World's Championship completed by May 1, 2008. The venue of the championship must be outside of Europe, being that the previous World's will be the 2007 ISAF Combined Worlds in Cascais, Portugal. This all makes very good sense as the 2008 regatta will qualify the final 25% of the countries that will be able to send entrants to the 2008 Olympics in China.

The IGC is considering different sites for this regatta and is asking if you have a viable facility that would want to be considered for this event, please contact the Central Office to obtain the proper forms to submit a request to host the 2008 World's Championships.

2005 REGATTA SCHEDULE

August-October, 2005

Date	Org.	Event
Aug 13-14	D5	King of Spain
Aug 13-14	D1	Ned Hay
Aug 13-14	D2	79th Lipton Cup
Aug 13-14	D4	59th Mission
Aug 13-14	D13	Bahnwärter-Preis, Alster
Aug 16-21	ISCYRA	North American Championship
Aug 19-21	D10	International Swedish Championship
Aug 21-22	D1	New England Masters
Aug 23-25	D15	Cto. de España Mem. JM Pando
Aug 26-28	D17	"100jährige"-TopStars
Aug 26-28	D12	CORK Regatta Canadian Championship
Sep 1-4	D17	Österr.Staatsmeisterschaft&Gams
Sep 3-4	D13	Herbstverbandsregatta
Sep 3-4	D10	GP 5 - Lasse Berg Memorial - Würth Cup
