PURPOSE:

Amend

Replace

RULE _____ as follows:
(number and title)

OR

SPECIFICATION **11.1** _____ as follows:
(number and title)

PROPOSED TEXT:

OLD: 11.1. Jibstay - Shall be of steel or stainless steel not less than 2.29 in diameter

NEW: 11.1 Jibstay - Shall be of steel or stainless steel or a synthetic man-made fibre based on ultra-high molecular weight polyethylene (PE-UHMW) or high-modulus polyethylene (HMPE) not less than 2.29 mm diameter.

REASON:

Suitable quality wire for the forestay with a diameter of less than 4 mm is currently becoming increasingly difficult to obtain. If the forestay breaks, there is usually considerable consequential damage. Last year, a proposal for the use of Dyneema was rejected due to brand name problems.

Polyethylene material also fulfils all the necessary criteria (tradenames example Dyneema, Spectra, Certran...) is cheaper, easy and quick to procure, does not require expensive special tools and is easy to replace.

This addition to the material can make Starboat sailing safer. There are no recognisable disadvantages.

For Office Use Only: _____ for _____

Date Received: _____
