Mark Mendelblatt by six and Brian Ledbetter by seven. The race committee moved the course in t club and beach and the course was covered with spectators on British Columbia Day.

Going into this race to win the regatta we could be beat by Ross, but without any boats between u had to be in the top five. We could also be behind Szabo with 2 boats between us and still win. So mind we went into the starting sequence.

Just before the start Ross made an attempt to sail us away from the line, but we were able to get u and make it back to the line for a pin boat start. After the start we put the bow down and headed fo for current relief. When the fleet made it to the shore we tacked up the edge dodging docks, morni kayakers, and dinghy sailors from three clubs. We were able to lee bow Ross a few times and pus into the current, but this put us back a few places.

We made it to the weather mark in ninth, ahead of Ross but Szabo was leading the regatta in sec So we spent the next 4 legs focusing on passing the boats ahead of us trying to get into the top 5 Szabo. Slowly we were able to pick off a few boats here and there to get back into it. By the finish worked our way up to second place behind Andy MacDonald with Star class rookie Jud Smith in th

Our second place finish was good enough to win the regatta with Ross in second overall and Szab English Bay Star Fleet and Royal Vancouver YC put on a spectacular awards dinner which was ca a fireworks competition between Canada, Spain and China.

We would like to thank our coach, James Lyne, for keeping us going in the right direction, our host luck charm Brent Foxall for a great place to stay and all the regatta volunteers who put on the eve
